PROFILE

I am a final year BTech Computer Science student specializing in Data Science, with certifications in Python, C++, Web Development, Database and Data Science. Passionate about web development, Data analytics and Data engineering.

SKILLS

- Programming Languages: Python, SQL, HTML, CSS, JavaScript, PHP
- Data and Business Analytics: Excel, Tableau
- Data Science: Basics of AI and ML algorithms
- Tools: Visual Studio Code, Github

PROFESSIONAL EXPERIENCE

Machine Learning Intern, TechnoHacks Edu Tech

Developed Machine Learning models for Diabetes Prediction, Wine Quality Prediction, and Credit Card Fraud Detection. Utilized Python, Scikit-learn, and TensorFlow for model development and deployment.

Web Development Intern, Codsoft

Designed Personal Portfolio page, Tribute page, and simple Calculator using key frames.

PROJECTS

V4U - Web Development

05/2025 – 06/2025

Engineered a dynamic e-commerce web platform with PHP and CSS to deliver a seamless online shopping experience. Designed and implemented critical features such as secure user authentication (login/registration), a dynamic shopping cart that updates in real-time, and a product catalog with a responsive layout. The project demonstrated proficiency in backend logic, database interaction, and front-end design to create a functional and aesthetically pleasing website.

Easy2Search - Web Development

06/2024 – 07/2024

Created a full-stack web platform using HTML, CSS, JS and PHP to centralize and provide official links to diverse government services, enhancing public access and convenience. Implemented a user-friendly interface with a dynamic search and categorization system to streamline the discovery of government application forms. The project architecture was focused on improving efficiency and providing a seamless user journey, successfully addressing a key public access challenge.

CERTIFICATES

Python 101 for Data Science: CognitiveClass.ai

Relational Database Basics: IBM | edX

Introduction to Data Science: Cisco Networking Academy

Learn C++: CodeChef

COMPETITIONS

SusHacks

04/2024

Finalist in SusHacks Hackathon - selected among the top 15 teams out of 110. Participated in Hackathon and developed a Smart Traffic Management System Prototype

LANGUAGES

Telugu, English
